# Airgas

an Air Liquide company

Airgas SRVS
Scan, record, view, send

• Save time and simplify management of your Certificates of Analysis

• Reduce errors in records keeping and eliminate manual data entry for all gases up to 15 components

• Track certificate expiration dates for your gas inventory

• Ensure regulatory compliance with accurate gas data and quick access to SDS

Streamline your gas data management

Eliminate manual data entry and associated errors, and quickly move important data from your Certificate of Analysis to your inbox using the Airgas SRVS app.
Our app includes features designed for efficiency and is powered by our patented and proprietary technology.
Simply scan the QR code on your certificate or cylinder label to view and send data directly to your device.
Now get peace of mind with error-free data intended to support your regulatory, safety and quality compliance.

Airgas SRVS (scan, record, view, send)
Streamline your gas data management

Are you ready to streamline gas data management and improve your analysis data transfer from your cylinder's Certificate of Analysis? The Airgas SRVS app, with new and improved features, quickly scans the QR code on your certificate or cylinder label to capture relevant and important cylinder information and loads it to your smart device. From there you have several data handling options.

- Get expanded capabilities for gas mixes up to 15 components

- Scan embedded data continuously via QR code without interruption—vibration indicates when scan is complete

- View data and email in CSV/Excel, RTF/Word or PDF file formats

- Transfer information easily by selecting your send-to location: DAS provider interfaces, email and/or text

- Improve cylinder management by specifying product nicknames and/or the exact locations of your cylinders in your own facility

- Know when your cylinder will expire with calendar notifications and automated email notices

- Get direct links to download original Certificates of Analysis and SDS

- Get equipment recommendations by gas type

- Improve scan visibility with convenient built-in flashlight

- Maintain off-line functionality when you cannot connect

- Update files in real time with sync capability

Improved navigation to easily scan QR codes

Direct links to SDS by product to download

Track and receive notifications for cylinder expirations

Managing your Certificates of Analysis and critical gas data is easier now with this supply chain solution from Airgas. Scan this QR code for more information on downloading the app from the App Store or Google Play.
