SAFETY DATA SHEET

Flammable Gas MIxture: Carbonyl Sulfide / Dimethyl Sulfide / Ethyl Mercaptan / Hydrogen Sulfide / Methane / Methyl Mercpatan / N-Propyl Mercaptan

Section 1. Identification

GHS product identifier	: Flammable Gas MIxture: Carbonyl Sulfide / Dimethyl Sulfide / Ethyl Mercaptan / Hydrogen Sulfide / Methane / Methyl Mercpatan / N-Propyl Mercaptan			
Other means of identification	Not available.			
Product use	: Synthetic/Analytical chemistry.			
SDS #	: 016567			
Supplier's details	: Airgas USA, LLC and its affiliates 259 North Radnor-Chester Road Suite 100 Radnor, PA 19087-5283 1-610-687-5253			
Emergency telephone number (with hours of operation)	: 1-866-734-3438			

Section 2. Hazards identification

OSHA/HCS status	: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Classification of the	: FLAMMABLE GASES - Category 1
substance or mixture	GASES UNDER PRESSURE - Compressed gas
GHS label elements	
Hazard pictograms	
Signal word	: Danger
Hazard statements	: Extremely flammable gas. May form explosive mixtures with air. Contains gas under pressure; may explode if heated. May displace oxygen and cause rapid suffocation. Harmful to aquatic life.
Precautionary statements	
General	: Read and follow all Safety Data Sheets (SDS'S) before use. Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand. Close valve after each use and when empty. Use equipment rated for cylinder pressure. Do not open valve until connected to equipment prepared for use. Use a back flow preventative device in the piping. Use only equipment of compatible materials of construction. Do not depend on odor to detect presence of gas. Approach suspected leak area with caution.
Prevention	: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
Response	: Leaking gas fire: Do not extinguish, unless leak can be stopped safely. Eliminate all ignition sources if safe to do so.
Storage	: Protect from sunlight when ambient temperature exceeds 52°C/125°F. Store in a well- ventilated place.
Date of issue/Date of revision	: 1/27/2016 Date of previous issue : No previous validation Version : 1 1/14

Section 2. Hazards identification

Disposal

- : Not applicable.
- Hazards not otherwise classified
- : In addition to any other important health or physical hazards, this product may displace oxygen and cause rapid suffocation.

Section 3. Composition/information on ingredients

Substance/mixture	: Mixture
Other means of	: Not available.
identification	

CAS number/other identifiers

CAS number	: Not applicable.
Product code	: 016567

Ingredient name	%	CAS number
methane	99	74-82-8
carbonyl sulphide	0.0001 - 0.05	463-58-1
Dimethyl sulfide	0.0001 - 0.05	75-18-3
Ethyl Mercaptan	0.0001 - 0.05	75-08-1
hydrogen sulfide	0.0001 - 0.05	7783-06-4
Methyl Mercaptan	0.0001 - 0.05	74-93-1
n-Propyl Mercaptan	0.0001 - 0.05	107-03-9

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary 1	irst aid measures		
Eye contact	 Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs. 		
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providin aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effect persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar tie, belt or waistband.		
Skin contact	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. To avoid the risk of static discharges and gas ignition, soak contaminated clothing thoroughly with water before removing it. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.		
Ingestion	: As this product is a gas, refer to the inhalation section.		
Most important symptoms	/effects, acute and delayed		
Potential acute health eff	<u>ects</u>		
Eye contact	: Contact with rapidly expanding gas may cause burns or frostbite.		
Inhalation	: No known significant effects or critical hazards.		
Skin contact	: Contact with rapidly expanding gas may cause burns or frostbite.		
Frostbite	: Try to warm up the frozen tissues and seek medical attention.		
Ingestion	: As this product is a gas, refer to the inhalation section.		
Date of issue/Date of revision	: 1/27/2016 Date of previous issue : No previous validation Version : 1 2/14		

Section 4. First aid measures

Over-exposure signs/sy	<u>/mptoms</u>
Eye contact	: No specific data.
Inhalation	: No specific data.
Skin contact	: No specific data.
Ingestion	: No specific data.

Indication of immediate med	dical attention and special treatment needed, if necessary
Notes to physician	 Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	: No specific treatment.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire-fig	hting measures
Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: Contains gas under pressure. Extremely flammable gas. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. If involved in fire, shut off flow immediately if it can be done without risk. If this is impossible, withdraw from area and allow fire to burn. Fight fire from protected location or maximum possible distance. Eliminate all ignition sources if safe to do so.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protec	<u>tive equipmen</u>	t and emergency proce	<u>dures</u>		
For non-emergency personnel	involving ar Keep unneo sources. N adequate vo	ny personal risk or withou cessary and unprotected o flares, smoking or flam	ire or explosion hazard. I t suitable training. Evacu personnel from entering. es in hazard area. Avoid ate respirator when venti quipment.	ate surroundi Shut off all ig breathing ga	ng areas. Inition s. Provide
For emergency responders		on suitable and unsuitable	deal with the spillage, take ble materials. See also th		
Date of issue/Date of revision	: 1/27/2016	Date of previous issue	: No previous validation	Version : 1	3/14

Section 6. Accidental release measures

Environmental precautions	: Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and materials for co	ontainment and cleaning up
Small spill	 Immediately contact emergency personnel. Stop leak if without risk. Use spark-proof tools and explosion-proof equipment.
Large spill	 Immediately contact emergency personnel. Stop leak if without risk. Use spark-proof tools and explosion-proof equipment. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

Protective measures	 Put on appropriate personal protective equipment (see Section 8). Contains gas under pressure. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Empty containers retain product residue and can be hazardous. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	: Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Eliminate all ignition sources. Keep container tightly closed and sealed until ready for use. Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F).

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name			Exposure limits			
n-Propyl Mercaptan			NIOSH REL (United States, 10/2013).			
			CEIL: 1.6 mg/m ³ 15 minutes.			
			CEIL: 0.5 ppm 15 minutes.			
Methyl Mercaptan		ACGIH TLV (United States, 3/2015).				
			TWA: 0.98 mg/m ³ 8 hours.			
			TWA: 0.5 ppm 8 hours.			
			NIOSH REL (United States, 10/2013).			
			CEIL: 1 mg/m ³ 15 minutes.			
			CEIL: 0.5 ppm 15 minutes.			
			OSHA PEL (United States, 2/2013).			
			CEIL: 20 mg/m ³			
			CEIL: 10 ppm			
			OSHA PEL 1989 (United States, 3/1989).			
Date of issue/Date of revision	: 1/27/2016	Date of previous issue	: No previous validation Version : 1 4/1-			

Flammable Gas MIxture: Carbonyl Sulfide / Dimethyl Sulfide / Ethyl Mercaptan / Hydrogen Sulfide / Methane / Methyl Mercpatan / N-Propyl Mercaptan

	TWA: 0.5 ppm 8 hours.
Dimethyl sulfide	ACGIH TLV (United States, 3/2015).
	TWA: 10 ppm 8 hours.
carbonyl sulphide	ACGIH TLV (United States, 3/2015).
	TWA: 5 ppm 8 hours.
	TWA: 12.28 mg/m ³ 8 hours.

Appropriate engineering : controls	Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.			
Environmental exposure : controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.			
Individual protection measures				
Hygiene measures :	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.			
Eye/face protection :	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.			
Skin protection				
Date of issue/Date of revision	: 1/27/2016 Date of previous issue : No previous validation Version : 1 5/14			

Section 8. Exposure controls/personal protection

: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.
: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

<u>Appearance</u>	
Physical state	: Gas.
Color	: Not available.
Melting/freezing point	: -187.6°C (-305.7°F) This is based on data for the following ingredient: methane.
Critical temperature	: Lowest known value: -82.45°C (-116.4°F) (methane).
Odor	: Not available.
Odor threshold	: Not available.
рН	: Not available.
Flash point	: Not available.
Burning time	: Not applicable.
Burning rate	: Not applicable.
Evaporation rate	: Not available.
Flammability (solid, gas)	: Not available.
Lower and upper explosive (flammable) limits	: Not available.
Vapor pressure	: Not available.
Vapor density	: Highest known value: 0.6 (Air = 1) (methane).
Gas Density (lb/ft ³)	: Only known value: 0.423 (methane).
Relative density	: Not applicable.
Solubility	: Not available.
Solubility in water	: Not available.
Partition coefficient: n- octanol/water	: Not available.
Auto-ignition temperature	: Not available.
Decomposition temperature	: Not available.
SADT	: Not available.
Viscosity	: Not applicable.

Date of issue/Date of revision

Flammable Gas Mlxture: Carbonyl Sulfide / Dimethyl Sulfide / Ethyl Mercaptan / Hydrogen Sulfide / Methane / Methyl Mercpatan / N-Propyl Mercaptan

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition.
Incompatibility with various substances	: Extremely reactive or incompatible with the following materials: oxidizing materials.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Hazardous polymerization : Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
n-Propyl Mercaptan	LC50 Inhalation Gas.	Rat	14600 ppm	1 hours
	LC50 Inhalation Gas.	Rat	7300 ppm	4 hours
	LD50 Oral	Rat	1790 mg/kg	-
Methyl Mercaptan	LC50 Inhalation Gas.	Rat	1350 ppm	1 hours
hydrogen sulfide	LC50 Inhalation Gas.	Rat	712 ppm	1 hours
Ethyl Mercaptan	LC50 Inhalation Gas.	Rat	8840 ppm	1 hours
	LC50 Inhalation Gas.	Rat	4420 ppm	4 hours
	LD50 Oral	Rat	682 mg/kg	-

Section 11. Toxicological information

Not available.

Carcinogenicity

Not available.

Reproductive toxicity

Not available.

Teratogenicity

Not available.

Specific target organ toxicity (single exposure)

Name		Route of exposure	Target organs
hydrogen sulfide	Category 3		Respiratory tract irritation

Specific target organ toxicity (repeated exposure) Not available.

Aspiration hazard

Not available.

Information on the likely routes of exposure	: Not available.
Potential acute health effects	<u>S</u>
Eye contact	: Contact with rapidly expanding gas may cause burns or frostbite.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: Contact with rapidly expanding gas may cause burns or frostbite.
Ingestion	: As this product is a gas, refer to the inhalation section.
Symptoms related to the phy	vsical, chemical and toxicological characteristics
Eye contact	: No specific data.
Inhalation	: No specific data.
Skin contact	: No specific data.
Ingestion	: No specific data.
Delayed and immediate effect	cts and also chronic effects from short and long term exposure
Short term exposure	
Potential immediate effects	: Not available.
Potential delayed effects	: Not available.
<u>Long term exposure</u>	
Potential immediate effects	: Not available.
Potential delayed effects	: Not available.
Potential chronic health eff	ects
Not available.	
General	: No known significant effects or critical hazards.
Carcinogenicity	: No known significant effects or critical hazards.
Date of issue/Date of revision	: 1/27/2016 Date of previous issue : No previous validation Version : 1 8/14

Section 11. Toxicological information

Mutagenicity	: No known significant effects or critical hazards.
Teratogenicity	: No known significant effects or critical hazards.
Developmental effects	: No known significant effects or critical hazards.
Fertility effects	: No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Not available.

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
n-Propyl Mercaptan	Acute LC50 60 to 100 µg/l Fresh water	Daphnia - Daphnia magna	48 hours
hydrogen sulfide	Acute LC50 2 µg/l Fresh water	Fish - Coregonus clupeaformis -	96 hours
		Yolk-sac fry	
Ethyl Mercaptan	Acute LC50 170 to 280 µg/l Fresh water	Daphnia - Daphnia magna	48 hours

Persistence and degradability

Not available.

Bioaccumulative potential

Product/ingredient name	LogPow	BCF	Potential
methane	1.09	-	low
n-Propyl Mercaptan	1.81 0.78	-	low low
Methyl Mercaptan Ethyl Mercaptan	1.5	-	low
Dimethyl sulfide	0.84	-	low

Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Empty Airgas-owned pressure vessels should be returned to Airgas. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.
