SAFETY DATA SHEET

Flammable Gas Mixture: 1-Butene / 1-Hexene / 1,3-Butadiene / 2-Methyl-1-Pentene / 3-Methyl-1-Pentene / Acetylene / Cis-2-Butene / Cyclohexane / Cyclopentane / Cyclopropane / Ethane / Ethylene / Helium / Hexane / Isobutane / Isobutylene / Isopentane / Methane / Methyl Acetylene / N-Butane / N-Pentane / Propadiene / Propane / Propylene / Trans-2-Butene

Section 1. Identification

| GHS product identifier | : Flammable Gas Mixture: 1-Butene / 1-Hexene / 1,3-Butadiene / 2-Methyl-1-Pentene / 3-Methyl-1-Pentene / Acetylene / Cis-2-Butene / Cyclohexane / Cyclopentane / Cyclopropane / Ethane / Ethylene / Helium / Hexane / Isobutane / Isobutylene / Isopentane / Methane / Methyl Acetylene / N-Butane / N-Pentane / Propadiene / Propane / Propylene / Trans-2-Butene |
|----------------------------------|--|
| Other means of identification | : Not available. |
| Product use | : Synthetic/Analytical chemistry. |
| SDS # | : 018738 |
| Supplier's details | : Airgas USA, LLC and its affiliates 259 North Radnor-Chester Road Suite 100 Radnor, PA 19087-5283 1-610-687-5253 |
| 24-hour telephone | : 1-866-734-3438 |

Section 2. Hazards identification

| This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). FLAMMABLE GASES - Category 1 GASES UNDER PRESSURE - Compressed gas GERM CELL MUTAGENICITY - Category 1B CARCINOGENICITY - Category 1 |
|--|
| GASES UNDER PRESSURE - Compressed gas GERM CELL MUTAGENICITY - Category 1B |
| SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - Category 3 |
| |
| |
| : Danger |
| Extremely flammable gas. Contains gas under pressure; may explode if heated. May form explosive mixtures in Air. May displace oxygen and cause rapid suffocation. May cause genetic defects. May cause cancer. May cause drowsiness and dizziness. |
| |
| : Read and follow all Safety Data Sheets (SDS'S) before use. Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand. Close valve after each use and when empty. Use equipment rated for cylinder pressure. Do not open valve until connected to equipment prepared for use. Use a back flow preventative device in the piping. Use only equipment of compatible materials of construction. Approach suspected leak area with caution. |
| |

Section 2. Hazards identification

| Prevention | : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves. Wear eye or face protection. Wear protective clothing. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use only outdoors or in a well-ventilated area. Avoid breathing gas. |
|----------------------------------|--|
| Response | : IF exposed or concerned: Get medical attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. Leaking gas fire: Do not extinguish, unless leak can be stopped safely. Eliminate all ignition sources if safe to do so. |
| Storage | : Store locked up. Protect from sunlight when ambient temperature exceeds 52°C/125°F. Store in a well-ventilated place. |
| Disposal | Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Hazards not otherwise classified | In addition to any other important health or physical hazards, this product may displace oxygen and cause rapid suffocation. |

Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture |
|-------------------|------------------|
| Other means of | : Not available. |

| 1-Hexene | 0.0001 - 0.05 | 592-41-6 |
| cyclopropane | 0.0001 - 0.05 | 75-19-4 |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

| Eye contact | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. |
|--------------|---|
| Inhalation | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. To avoid the risk of static discharges and gas ignition, soak contaminated clothing thoroughly with water before removing it. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| Ingestion | : As this product is a gas, refer to the inhalation section. |

Most important symptoms/effects, acute and delayed

Potential acute health effects

| Eye contact | : Contact with rapidly expanding gas may cause burns or frostbite. |
|------------------------|---|
| Inhalation | : Can cause central nervous system (CNS) depression. May cause drowsiness and dizziness. |
| Skin contact | : Contact with rapidly expanding gas may cause burns or frostbite. |
| Frostbite | : Try to warm up the frozen tissues and seek medical attention. |
| Ingestion | : Can cause central nervous system (CNS) depression. As this product is a gas, refer to the inhalation section. |
| Over-exposure signs/sy | <u>/mptoms</u> |
| Eye contact | : No specific data. |
| Inhalation | Adverse symptoms may include the following:, nausea or vomiting, headache, drowsiness/fatigue, dizziness/vertigo, unconsciousness |
| Skin contact | : No specific data. |
| Ingestion | : No specific data. |
| ndication of immediate | medical attention and special treatment needed, if necessary |
| Notos to physician | Treat symptomatically. Contact poison treatment specialist immediately if large |

Ī

| Notes to physician | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
|----------------------------|---|
| Specific treatments | : No specific treatment. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

Section 5. Fire-fighting measures

| Extinguishing media | |
|--|---|
| Suitable extinguishing media | : Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media | : None known. |
| Specific hazards arising from the chemical | : Contains gas under pressure. Extremely flammable gas. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. |
| Hazardous thermal decomposition products | : Decomposition products may include the following materials: carbon dioxide carbon monoxide |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. If involved in fire, shut off flow immediately if it can be done without risk. If this is impossible, withdraw from area and allow fire to burn. Fight fire from protected location or maximum possible distance. Eliminate all ignition sources if safe to do so. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

| For non-emergency personnel | : | Accidental releases pose a serious fire or explosion hazard. No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing gas. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|---|---|
| For emergency responders | : | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". |
| Environmental precautions | : | Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). |
| Methods and materials for co | n | ainment and cleaning up |

Small spill : Immediately contact emergency personnel. Stop leak if without risk. Use spark-proof tools and explosion-proof equipment. Large spill : Immediately contact emergency personnel. Stop leak if without risk. Use spark-proof

tools and explosion-proof equipment. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

| Protective measures | : Put on appropriate personal protective equipment (see Section 8). Contains gas under pressure. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Avoid breathing gas. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting |
|---------------------|---|
| | |

Section 7. Handling and storage

| | and material handling) equipment. Use only non-sparking tools. Empty containers retain product residue and can be hazardous. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement. |
|--|---|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |
| Conditions for safe storage, including any incompatibilities | : Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Store locked up. Eliminate all ignition sources. Keep container tightly closed and sealed until ready for use. Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F). |

Section 8. Exposure controls/personal protection

```
Respiratory protection
```

: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

| <u>Appearance</u> | | |
|--|---|--|
| Physical state | 1 | Gas. |
| Color | 1 | Not available. |
| Melting/freezing point | 1 | -169.15°C (-272.5°F) This is based on data for the following ingredient: ethylene. Weighted average: -191.42°C (-312.6°F) |
| Critical temperature | : | Lowest known value: -267.9°C (-450.2°F) (helium). |

Section 10. Stability and reactivity

| Reactivity | : No specific test data related to reactivity available for this product or its ingredients. |
|------------------------------------|---|
| Chemical stability | : The product is stable. |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur. |
| Conditions to avoid | : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials | : Oxidizers |

Section 10. Stability and reactivity

Hazardous decomposition products

: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Hazardous polymerization : Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
|-------------------------|-----------------------|---------|--------------------------|----------|

Specific target organ toxicity (repeated exposure)

| Name | | Route of exposure | Target organs |
|----------|------------|-------------------|----------------|
| n-hexane | Category 2 | Not determined | Not determined |

Aspiration hazard

| Name | Result |
|-------------|--------------------------------|
| cyclohexane | ASPIRATION HAZARD - Category 1 |

| Information on the likely |
|---------------------------|
| routes of exposure |

: Not available.

Potential acute health effects

| Fotential acute health enects | |
|-------------------------------|---|
| Eye contact | : Contact with rapidly expanding gas may cause burns or frostbite. |
| Inhalation | : Can cause central nervous system (CNS) depression. May cause drowsiness and dizziness. |
| Skin contact | : Contact with rapidly expanding gas may cause burns or frostbite. |
| Ingestion | : Can cause central nervous system (CNS) depression. As this product is a gas, refer to the inhalation section. |
| | |

Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact | : No specific data. |
|--------------|---|
| Inhalation | Adverse symptoms may include the following:, nausea or vomiting, headache, drowsiness/fatigue, dizziness/vertigo, unconsciousness |
| Skin contact | : No specific data. |
| Ingestion | : No specific data. |

Delayed and immediate effects and also chronic effects from short and long term exposure

| Short term exposure | |
|--------------------------------|---|
| Potential immediate effects | : Not available. |
| Potential delayed effects | : Not available. |
| Long term exposure | |
| Potential immediate effects | : Not available. |
| Potential delayed effects | : Not available. |
| Potential chronic health ef | fects |
| Not available. | |
| General | : No known significant effects or critical hazards. |
| Carcinogenicity | : May cause cancer. Risk of cancer depends on duration and level of exposure. |
| Mutagenicity | : May cause genetic defects. |
| Teratogenicity | : No known significant effects or critical hazards. |
| Developmental effects | : No known significant effects or critical hazards. |
| Date of issue/Date of revision | : 10/25/2016 Date of previous issue : No previous validation Version : 1 |

Section 11. Toxicological information

Fertility effects

: No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Not available.

Section 12. Ecological information

Toxicity

| Product/ingredient name | Result | Species | Exposure |
|-------------------------|-----------------------------------|--|----------------------|
| n-hexane cyclohexane | Acute LC50 8300 µg/l Marine water | Fish - Oreochromis mossambicus Fish - Morone saxatilis - Juvenile (Fledgling, Hatchling, Weanling) | 96 hours 96 hours |

Persistence and degradability

Not available.

Bioaccumulative potential

| Product/ingredient name | LogPow | BCF | Potential |
|-------------------------|--------|---------|-----------|
| ethylene | 1.13 | - | low |
| ethane | 1.09 | - | low |
| propylene | 1.77 | - | low |
| methane | 1.09 | - | low |
| Propane | 1.09 | - | low |
| Helium | 0.28 | - | low |
| 1-Butene | 2.4 | - | low |
| 1,2-propadiene | 1.45 | - | low |
| Trans-2-Butene | 2.31 | - | low |
| N-Butane | 2.89 | - | low |
| Isobutylene | 2.34 | - | low |
| isobutane | 2.8 | - | low |
| Cis-2-Butene | 2.33 | - | low |
| methyl acetylene | 0.94 | - | low |
| acetylene | 0.37 | - | low |
| n-pentane | 3.45 | 171 | low |
| isopentane | 3 | 171 | low |
| 1,3-butadiene | 1.99 | 10 | low |
| n-hexane | 4 | 501.187 | high |
| cyclopentane | 3 | 70.8 | low |
| cyclohexane | 3.44 | 167 | low |
| 1-Hexene | 3.87 | 2.59 | low |
| cyclopropane | 1.72 | - | low |

Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Empty Airgas-owned pressure vessels should be returned to Airgas. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.

Section 14. Transport information

| | _ | | | | |
|-------------------------------|--|---|---|---|---|
| | DOT | TDG | Mexico | IMDG | IATA |

| WHMIS (Canada) | : Class A: Compressed gas. Class B-1: Flammable gas. Class D-2A: Material causing other toxic effects (Very toxic). |

Section 15. Regulatory information

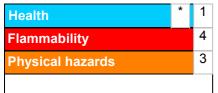

CEPA Toxic substances: The following components are listed: Volatile organic compounds; Methane; 1,3-Butadiene
Canadian ARET: None of the components are listed.
Canadian NPRI: The following components are listed: Ethylene; Volatile organic compounds; Propylene; Volatile organic compounds; Butene (all isomers); Propane
Alberta Designated Substances: None of the components are listed.
Ontario Designated Substances: None of the components are listed.
Quebec Designated Substances: None of the components are listed.

Section 16. Other information

Canada Label requirements : Class A: Compressed gas.

Class A: Compressed gas. Class B-1: Flammable gas. Class D-2A: Material causing other toxic effects (Very toxic).

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.
